Jaipur,Rajasthan,India

## SKILLS

Python

DataStructure & Algorithms

Linux

Machine Learning Algorithms

Numpy

pandas

Scikit-Learn

matplotlib

SqlAlchemy

Flask

Networking(Basics)

Streamlit

## PROJECTS

### Share A Bed

A bed donation web app

- I with 3 more friends created this project during a Hackathon . In this web app we created the front end with HTML & CSS and backend with PHP and MYSQL DATABASE

### Coursu - A Course Recommendation web

This is a website which Recommend the various best Courses for learning from the all around web based on user activity

- i with 2 more friends creating this website which uses machine learning Recommendation system to give the learning course to user based on his previous activity, we used Web scraping for datasets , HTML & CSS , Recommendation System.

### Blogging Website

I created a Blogging website to write the Technical Blogs

- This Project was created using Flask framework and Python .For front end i used the HTML and CSS with Jinja Templating and for backend i used the SQLAlchemy database.

## CERTIFICATION

Crash course on Python

Google

Pytorch Zero to GAN's

Jovian.ml

Stats for Data Science

ineuron

Microsoft Developers Badge

## PROGRAMMING

Python

Html & Css

C++

SQL
